Here was
the epoche
of wearing
masks

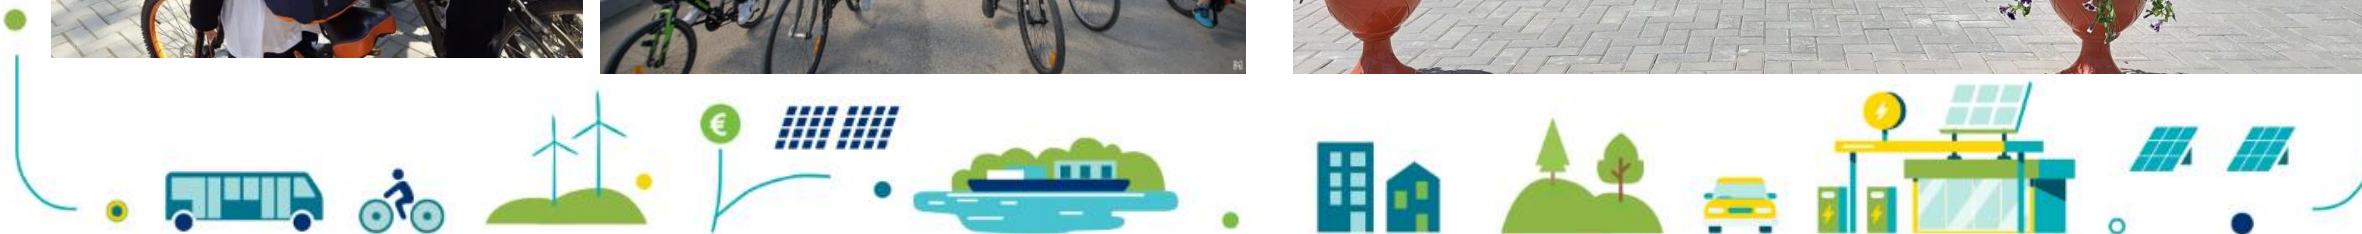

EU4Energy

Communities events with CoM East signatories

EcoEnergy Velo Marathon

- 2021 – the community event in Lozova, Vorniceni, Strășeni
- 2022 – the second and third edition in Lozova, the second edition in Vorniceni
- About 500 people involved in eco-energy activities, promoting health live stile, CO2 reduction

EU4Energy

Communities events

Environmental festival „Strășeni, mon amour”, 2021

dedicated to raising awareness about protection of environment, wastewater and biodiversity

- 5 communities were involved – Lozova, Vorniceni, Sireți, Strășeni, Zubrești – Signatories of Covenant of Mayors for Climate and Energy
- 2000 people more aware of their role in solving environmental problems, more careful with the environment - people understood where they came from and as a result we had a festival without plastic waste.

EU4Energy

Innovative way to understand old problems

- All love puzzle. Why to not play in a game dedicated to waste management in a community?
- Funny puzzle showed the situation in a village without working waste management system and with a working system and the importance of payment for the service.
- The data for puzzle visualization were collected after a series of workshops and trainings with mayors and community leaders from Strășeni, Lozova, Sireți, Vorniceni and Zubrești.

EU4Energy

Involving the young generation

- 12 Green Teams were created in 12 schools in Republic of Moldova in a project implemented in 2021-2022 by AEER, in partnership with AJMTEM and AEE.
- Energy audits in the schools of the 6 CoM East signatories were done by children.
- Now they are visiting the householders from their village for quick audit and give recommendations for improving the energy efficiency and save energy.

Cei mai mari
consumatori
de energie electrică
din casele noastre

Frigiderul

17%

Frigiderul consumă până la 50% mai multă energie dacă stă aproape de calorifer sau aragaz, iar congelatorul cu până la 30% mai multă energie, dacă în el se adună gheață.

Aparate electronice

14%

Lăsând tehnica în regim stand-by, aceasta continuă să consume energie - tocmai 40-70%.

На сколько мы можем
сократить расходы
на отопление, если:

Mașina de spălat

10%

Programul de spălare la 40° C în loc de 60° C reduce consumul de electricitate a mașinii de spălat cu peste 33%.
