The main lesson we can pull from Ukraine's experience: the energy transition is not only about climate change. It's also about security, sovereignty and survival.

What do Ukrainian cities' resilience teach us?

It has been four years since Russia launched its full-scale invasion of Ukraine. Four years of war and devastation have scarred the country and its people. Yet across Ukraine, cities have shown extraordinary resilience. Ukrainian cities are demonstrating, under the harshest imaginable conditions, that the path to decentralised, clean energy is also the path to security. Europe would do well to listen.
